Claim Rejections - 35 USC § 103

The rejection of the claims under 35 USC 103 in view of Iwata '048 is hereby withdrawn in view of the comments in the response of August 31, 2007.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 1-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over EP 1,172,141 for the reasons set forth in the previous office action. With respect to the new claims excluding an acid other than phosphoric acid, it is considered that such is embraced by the teaching of EP 1,172,141. A negative teaching or a "teaching away" is not necessarily indicative of non-obviousness when the teaching is clearly envisioned by the reference. Comparative example in paragraph [0028] clearly envisions this feature, although it is a non-preferred embodiment.

Response to Arguments

Applicant's arguments filed August 31, 2007 have been fully considered but they are not persuasive.

With respect to the rejection of the claims over EP 1,172,141, the applicant argues that the reference does not teach the required use of molybdenum, phosphorus, cobalt and nickel as recited in the instant claims.

This line of reasoning is not found convincing because a reference is valid for all that it discloses and conveys to the skilled artisan, not merely that which is exemplified. EP 1,172,141 states at paragraph [0018] that the catalyst contains molybdenum, cobalt, nickel and phosphorus in amounts commensurate with those set forth in the instant claims. Accordingly, the reference is considered to adequately suggest the use of all of the claimed elements to the skilled artisan.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
